Coding Exam (Fitness and Lifestyle Group)

diversify Offshore Staffing Solutions

When writing your code, keep the following points in mind:

- Your code should be written in C#
- Your code should be production ready
- Your code should have unit test
- Your code should be understandable and maintainable by other developers
- Your code should be robust and handle error situations
- Your code should be bug free, compile and work.
- Source code must be submitted in ZIP format (no binaries)

Exercise

Write a program that receives four integer inputs to indicate the weight and size of a parcel for postage, and returns the cost of delivery.

The user inputs are:

1. Weight (kg)
2. Height (cm)
3. Width (cm)
4. Depth (cm)

The rules for calculating the cost of delivery in order of priority:

1 Reject If the weight exceeds 50kg - N/A
2 Heavy If the weight exceeds 10kg $15 x Weight (kg)
3 Small If the volume is less than 1500 $0.05 x Volume
4 Medium If the volume is less than 2500 $0.04 x Volume
5 Large $0.03 x Volume

Note: Volume is calculated by Height x Width x Depth.
Note: The rule matched with the highest priority should be used to calculate the cost of delivery.

Examples

1. Enter Weight in kg: 10 Enter Height in cm: 20 Enter Width in cm: 5 Enter Depth: 20
   Category: Medium
   Cost: $80
2. Enter Weight in kg: 22 Enter Height in cm: 5 Enter Width in cm: 5 Enter Depth: 5
   Category: Heavy
   Cost: $330
3. Enter Weight in kg: 110 Enter Height in cm: 20 Enter Width in cm: 55 Enter Depth: 120
   Category: Rejected
   Cost: N/A

Once you are done, you may send in your consolidated test response through ZIP format at jayvee.olgado@diversifyoss.com

Good luck!
